

Raja Bilal Khurram

Rawalpindi, Pakistan | +92 3355646753 | khurrambilal647@gmail.com | [LinkedIn](#)

Education

Ghulam Ishaq Khan Institute of Engineering and Technology

Bachelor of Science in Computer Science

GIKI, Pakistan

Sep 2023- Present

Courses: Database Management, Machine Learning (ML), Artificial Intelligence (AI), Theory of Automata, DSA

Professional Experience

Fauji Fertilizer Company

Software Engineering Intern (BTT)

Rawalpindi, Pakistan

Jul 2025- Sep 2025

- Engineered a high-concurrency Blazor WebAssembly application using .NET/C# to digitize appraisals for 500+ employees.
- Integrated a real-time synchronization engine for 1000+ records, achieving 97% data accuracy across enterprise databases.

Military College of Signals, Campus of NUST

Cybersecurity Intern

Rawalpindi, Pakistan

Jul 2024- Aug 2024

- Optimized 1500+ lines of cryptographic C code, achieving a 4% runtime improvement in the Camellia cipher through loop unrolling and structural analysis.
- Collaborated with 2 senior research engineers to benchmark and compare cryptographic implementations

Eyesight Electronics

Game Development Intern

Rawalpindi, Pakistan

May 2024- Jul 2024

- Developed foundational gameplay mechanics and designed UI modules in Unity using C#, worked remotely in a 12-member team.

Leadership Experience

Cultural Dramatics and Entertainment Society - GIKI, Pakistan

Head of Technology & Digital Branding

GIKI, Pakistan

Oct 2024- Present

- Orchestrated end-to-end digital branding for Annual Play 2025 and Basant Festival, managing a team to produce 40+ digital assets that increased event visibility and boosted social media engagement by 23%.
- Coordinated with 11 universities to successfully host 186 participants and 9 performing teams at APPAF '25.

GIKI Consulting Group - GIKI, Pakistan

Subhead Inductions

GIKI, Pakistan

Mar 2025- Apr 2025

- Spearheaded induction campaign, generating 50+ sign-ups and recruiting 17 members through targeted outreach.

Academic Projects

Blink-Talk – Assistive AI Communication Suite

- Constructed an offline-ready Computer Vision (CV) suite using MediaPipe and Python; integrated a Large Language Model (LLM) to achieve <300ms latency for paralyzed individuals' communication.

EatGuru – Automated Budget & Nutrition Engine

- Designed a predictive algorithm to manage calorie and budget surpluses through real-time plan re-calibration; onboarded 24 paying users within 3 days of deployment.

Pocket Agent – High-Performance Offline AI Agent

- Fine-tuned a high-performance local AI agent by fine-tuning a 0.5B LLM using Unsloth/LoRA; achieved 100% tool-calling accuracy and sub-200ms CPU latency via 4-bit GGUF quantization.

Khata – Restaurant Management System

- Architected a 12-table ACID-compliant RMS using Python and SQLite.
- Implemented RBAC dashboards to automate inventory for 50+ items.

Technical Skills

- Programming Languages: Python, C++, C, C#, TypeScript, JavaScript, SQL (PostgreSQL).
- AI & Machine Learning: Large Language Model (LLM), Fine-tuning (LoRA, Unsloth), Retrieval-Augmented Generation (RAG), Agentic Workflows (n8n), PyTorch, Computer Vision.
- Web & Backend Frameworks: .NET Core, Entity Framework, FastAPI, Flask, React, Streamlit.
- Data Science & Tools: NumPy, Pandas, Git, llama.cpp, Hugging Face, Proteus, Linux.
